

IONIQ 5

IONIQ

Lead the charge.

Breathtakingly beautiful and amazingly advanced, the IONIQ 5 is redefining the way people look at electric cars. Elegantly combining innovative concept car design with amazing performance, environmentally friendly materials, and an astonishing array of smart tech – this all-electric midsize CUV is a game changer.

Distinctive. Iconic. Pure.

The IONIQ 5's pure design is a refreshing take on electric vehicles, stripping away complexity to celebrate clean lines and minimalistic structures. Smooth and seamless with a strong focus on minimalism, Hyundai's first-ever clamshell hood spans the entire width of the car – minimizing panel gaps for a clean, high-tech look. The crown jewels of the iconic front-end presence are the distinctive LED headlamps with their 256 Parametric Pixels – unique jewel-like design elements that will feature on the exterior of all future IONIQ models.

Designed for beauty, engineered for efficiency.

As eye-catching as it is, the IONIQ 5 has been also carefully engineered for enhanced aerodynamics – leading to a phenomenal 0.288 drag coefficient, one of the best in its class. Aerodynamic components like active front air flaps, a full under-body covering, and the rear spoiler minimize drag and maximize performance. The spoiler's hidden holes induce flow pressure to the rear glass and improve the clean flow characteristics of the wake. Naturally, all this aerodynamic efficiency helps you go farther on every single charge, but it also makes every ride more pleasant – delivering optimal quietness through wind noise reduction.

Design details.

IONIQ 5's progressive design represents a departure from past norms, exploring a new design freedom offered with a dedicated BEV platform. This is the redefinition of timeless design, a theme that will expand as the IONIQ line-up grows.

Front bumper with active air flap.

The front bumper is defined by the eye-catching V-shape, which emphasizes the kinetic cube LED headlamps. The active air flap integrated above the skid plate enhances the high-tech look in the front – as well as improving energy efficiency when closed – and cooling vehicle parts as needed when open.

Parametric Pixels rear light signature.

The innovative LED lighting design can be found in the back as well. The evocative design of the rear bumper and hatch harmonizes powerfully with the rectangular Parametric Pixels rear light signature and slice rear reflectors.

Aero-optimised 20" alloy wheels.

The exclusive aero-optimized wheels echo the Parametric Pixel design theme, harmonizing beautifully with the sleek profile. They are offered in a super-sized 20" diameter, the largest rims ever fitted to a Hyundai EV.

Panoramic sunroof.

Immerse yourself in every drive with the breathtaking panoramic roof, connecting you to the world around you like never before.

Live, drive, work, relax.

Inside the IONIQ 5, the lines between living space and moving space are being blurred. Our new, dedicated EV platform allowed us to re-create the interior as a whole new in-car experience. A larger flat floor, highly adjustable front seats that can be fully reclined, make for an extraordinary experience – and maximize the sense of interior openness.

SUV versatility for electric mobility.

Designed to fit everything you and your busy life can throw at it, the highly versatile IONIQ 5 offers plenty of room for both passengers and cargo. IONIQ 5's 3000-mm wheelbase offers the spaciousness of a large passenger car in a mid-size CUV. And with the 60:40 foldable seats both folded down, it's perfect for weekend escapes or transporting bulky items. We also took the space where the petrol engine would normally be located – and made some extra space for your stuff. A second boot in the front provides up to 57 litres of additional cargo space. So, no matter where life's adventures take you, IONIQ 5 is there for you every step of the way, pushing the envelope of an electric mobility lifestyle.

Technologically advanced, eco-friendly, and plugged into today's customers' needs, the IONIQ 5 is a masterful integration of digital and analog technologies. In the driver's space, the past, present, and future have been brought together to create a harmoniously pleasant driving experience. The centerpiece of the sleek modular dashboard is the extra wide integrated display, which combines a 12.25" full-touch infotainment screen and a 12.25" digital cluster for a high-tech look that comes standard. And for a touch of low-tech style, there's also an old-school magnetic board to the left of the digital cluster where you can hang up notes or pictures with mini-magnets. Everything else you need is also right at your fingertips. The elegant rotary-type shift-by-wire controller is located on the steering column, and you can easily adjust the level of regenerative braking through the paddle shifters mounted on the steering wheel.

Making life as connected as you want to be.

The Hyundai IONIQ 5 redefines connectivity with its premium Bose sound system, providing an immersive audio experience that envelops passengers in rich, high-quality sound. Its advanced infotainment system seamlessly integrates Android Auto and Apple CarPlay smartphone mirroring, offering intuitive access to navigation, media, and apps. Whether cruising through city streets or embarking on a cross-country adventure, the Hyundai IONIQ 5 ensures passengers stay effortlessly connected and entertained, transforming every journey into an enjoyable experience.

Premium Bose sound system with eight speakers.

Apple CarPlay™ and Android Auto™ smartphone mirroring.

Technology highlights.

The IONIQ 5 is redefining the way people see electric vehicles, providing a truly new experience with its innovative use of interior space and cutting-edge smart tech.

Wireless charging.

Vehicle-to-Load technology (V2L).

With IONIQ 5, you can power any device and charge electric bicycles, scooters, or camping equipment – on the move or at your favorite outdoor location. There's an on-board 230V plug located by the second-row seats. Using a converter that plugs into the bidirectional exterior charging port, you can power devices up to 3.6 kW even when the vehicle is turned off.

Next-level electric performance.

Exclusively available in the 72.6 kWh AWD variant, this all-electric midsize CUV seamlessly integrates exceptional performance with cutting-edge smart technology, boasting a remarkable driving range of up to 430 km. With its agile acceleration, the IONIQ 5 accelerates from 0 to 100 km/h in just 5.2 seconds, ensuring an exhilarating driving experience. Paired with Hyundai's signature all-wheel-drive system HTRAC, this model offers robust 4x4 capabilities, ensuring traction and control across various terrain and weather conditions, making it a true game-changer in the electric vehicle market.

Range/Charging/Performance.

Indulge in top-tier performance with our exclusive offering: the 72.6 kWh (long range) and AWD configuration. The 72.6 kWh battery delivers 305 PS (225 kW) in AWD for you to experience the epitome of electric driving, setting new standards for automotive excellence.

*Driving range may vary slightly depending on road conditions, your driving style, and the temperature. It is also dependent on the type of tyres equipped. Technical data is not final.

Regenerative braking.

Equipped with cutting-edge technology for intelligent driving, the IONIQ 5's regenerative braking system charges the battery while driving by using the electric motor to slow the vehicle. You can control the level of energy that the system regenerates and stores in the battery by adjusting the level of regenerative braking with the steering wheel-mounted paddle shifters. The higher the level, the more the car slows and charges the battery when you take your foot off the accelerator. Holding the left paddle shifter activates maximum strength of regenerative braking and you can slow the car to a complete stop in this way without having to press the conventional brake pedal. Additionally, the Smart Regenerative Braking System utilizes the front radar sensors to automatically control the level of regenerative braking to react to the traffic ahead, slowing you down accordingly. There is also a one-pedal mode, which allows acceleration/deceleration/stopping using only the gas pedal. Simply tap on the left paddle shifter to enter the fourth stage to enable the one-pedal function and the regenerative braking stage symbol changes to the one-pedal symbol.

Features.

20" Alloy wheels

Parametric Pixel Dual LED Headlamps

Dual LED Headlamps

Parametric Pixel LED Taillamps

Auto-Flush Door Handles

Multi Charging Support

12.3" Digital Cluster

12.3" Infotainment System with Android Auto & Apple Carplay

Column Type Shift-by-Wire

Drive Modes

Paddle Shifters with Regenerative Braking

20" Alloy Wheels
